Addressable Nursecall

Quantec

VERSATILE

RELIABLE

ADAPTABLE

Revolutionary...

..that's just one of the words that have been used to describe Quantec, the most innovative nursecall system on the market.

Costing over half a million pounds to develop, the way the system operates can be tailored to suit a care facility's specific requirements. For example, different day, night and call divert arrangements can be easily accommodated to meet the exact operational needs and precise layout of any building.

This flexibility, coupled with many other advanced features such as multiple call levels, free built-in datalogging, simple system reprogramming and full monitoring of all network devices, makes Quantec the obvious choice for nursing homes and hospitals alike.

easy to use

To say Quantec is easy to use is an understatement. Despite it's many features, it is probably one of the easiest to use nursecall systems ever manufactured.

Calls can be made from a variety of devices including tail call leads, ceiling pulls and pressure pads, each designed to suit different levels of patient dexterity. Once triggered, calls are reset at the room from which they were made via a button or magnetic reset key.

A confidence light on the bedhead reassures patients that calls have been registered, and for those prone to wander, door monitoring points and portable movement detectors can be used to provide added protection.

clear & concise

From the moment Quantec is up-and-running, you will begin to reap the benefits of the most advanced, versatile and affordable nurse call system on the market.

Quantec's easy-to-read backlit displays show the precise location of all relevant incoming calls and indicate their presence via a gentle, unobtrusive alarm tone.

Should you visit a room only to find additional assistance is required, simply reach across to the nearest call point to make a 'help required' or 'emergency' call. Quantec will prioritise your call, show it on all relevant displays and indicate it's higher priority with a more urgent alarm tone easily recognisable by fellow staff.

a priceless asset

In an environment where efficiency is paramount Quantec delivers, helping to save staff time, minimising disturbance and improving the quality of patient care.

Quantec exceeds current registration requirements in all areas with features such as **staff presence**, **call accept** and **automatic call divert** all provided as standard. These features, combined with Quantec's unparalleled reliability will serve to make your premises more cost-efficient and help you provide the highest standards of modern patient care.

Quantec

Addressable Nursecall

Multiple call levels

Standard patient call, help required, emergency and optional infra-red staff protection.

Staff presence

Helps managers, matrons and carers locate their colleagues by showing where they are working.

Optional paging facilities

Optional alphanumeric and tone-only paging facilities available for carers on the move.

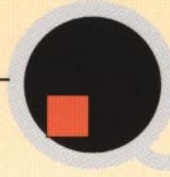

Flexible call routing

Quantec can be tailored to suit your exact operational requirements, whatever they may be.

Night mode

Allows Quantec to work in a totally different way at night, providing for fewer staff and reduced sound levels.

Device monitoring

Quantec constantly supervises all network devices and informs you of any problems, reducing maintenance time and costs.

Call accept

Saves valuable time by preventing more than one member of staff responding to the same call.

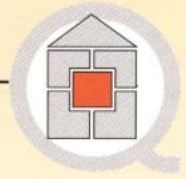

Call follower sounders

Informs staff that other calls are waiting by sounding a soft tone in all occupied rooms (night mode only, optional).

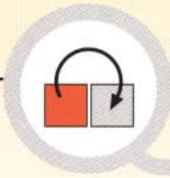

Programmable network controller

Allows Quantec to adapt to your changing requirements with no expensive rewiring, no mess and no fuss.

Automatic call divert

Transfers any unanswered calls to other areas to ensure they are responded to within a pre-determined time.

Free built-in datalogger

Records the date, time, type and location of every call and reset for output to a serial printer.

Easy to install and expand

Quantec's 'two wire' data transfer system makes it ideal for new and established sites where existing wiring can often be utilised.

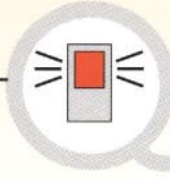

Follow-me lights

Illuminates overdoor lights and corridor lights in sequence to visually guide staff to the source of a call.

Infra-red staff protection

Optional infra-red security transmitter protects staff against disturbed patients, intruders and aggressive visitors.

Tried, trusted and respected

From large NHS trusts to renowned nursing home groups, Quantec is specified by some of the UK's most prestigious care providers.

The Nursecall Specialists

Designed and manufactured by C-TEC, an ISO 9001 accredited company, Quantec is the biggest breakthrough in care communication equipment for many years.
